Il est crucial de fixer solidement le cabinet mural au mur en localisant les montants de la structure du mur. Si le cabinet n'est pas fixé solidement, des bris majeurs au cabinet et de possibles blessures aux utilisateurs peuvent survenir. Utiliser des vis plus longues ou plus grosses au besoin selon la nature du mur. Evolutek n'est pas responsable de bris ou blessures causées par une installation inappropriée.

It is mandatory to fix the cabinet firmly to the wall by locating inwall studs. If cabinet is not secured properly, severe damage to the cabinet and possible injuries to people may result. Use longer or bigger screws if needed depending on wall type. Evolutek is not responsible for part damages or injuries caused by inappropriate installation.
